

ASSIGNMENT 2

CONDITIONAL STATEMENTS USING JAVASCRIPT

1. Create two variables x and y then, assign the value for each and perform greater than operator and display the greatest one using "if-else" statement.

```
conditional.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3
4  <head>
5      <meta charset="UTF-8">
6      <meta name="viewport" content="width=device-width, initial-scale=1.0">
7      <title>Conditional Statement</title>
8  </head>
9
10 <body>
11     <script src="conditional.js"></script>
12 </body>
13
14 </html>
```

```
conditional.js > ...
1  let x = 20;
2  let y = 300;
3
4  if (x > y) {
5      document.write("X is greater.");
6  } else {
7      document.write("Y is greater.");
8  }
```

Output:

Y is greater.

2. Find the Grade of total marks take 5 subject marks from user Find the percentage of total marks. Initialize the Grading rules and used the "if else if" statement.

```
gradeCalc.html > ...
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <title>Grade Calculator</title>
8 </head>
9
10 <body>
11   <script src="gradeCalc.js"></script>
12 </body>
13
14 </html>

gradeCalc.js > ...
1 let marks1 = parseFloat(prompt("Enter marks of Mathematics: "));
2 let marks2 = parseFloat(prompt("Enter marks of Computer Programming II: "));
3 let marks3 = parseFloat(prompt("Enter marks of Discrete Mathematics: "));
4 let marks4 = parseFloat(prompt("Enter marks of Digital Logic: "));
5 let marks5 = parseFloat(prompt("Enter marks of Web Technology I: "));
6
7 let total = (marks1 + marks2 + marks3 + marks4 + marks5);
8 let per = total / 5;
9
10 if (per <= 100 && per >= 90) {
11   document.write("Grade: A+");
12 } else if (per < 90 && per >= 80) {
13   document.write("Grade: A");
14 } else if (per < 80 && per >= 70) {
15   document.write("Grade: B+");
16 } else if (per < 70 && per >= 60) {
17   document.write("Grade: B");
18 } else if (per < 60 && per >= 50) {
19   document.write("Grade: C+");
20 } else if (per < 50 && per >= 40) {
21   document.write("Grade: C");
22 } else if (per < 40 && per >= 35) {
23   document.write("Grade: D+");
24 } else {
25   document.write("Grade: NG");
26 }
```

Output:

192.168.1.74:5500 says
Enter marks of Mathematics:
90
OK Cancel

192.168.1.74:5500 says
Enter marks of Computer Programming II:
97
OK Cancel

192.168.1.74:5500 says
Enter marks of Discrete Mathematics:
95
OK Cancel

192.168.1.74:5500 says Enter marks of Digital Logic: 98 OK Cancel	192.168.1.74:5500 says Enter marks of Web Technology I: 98 OK Cancel
---	--

Grade: A+

3. Write a code to display current day using switch case statement.

```
dayCheck.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3
4  <head>
5      <meta charset="UTF-8">
6      <meta name="viewport" content="width=device-width, initial-scale=1.0">
7      <title>Day Checker</title>
8  </head>
9
10 <body>
11     <script src="dayCheck.js"></script>
12 </body>
13
14 </html>

dayCheck.js > ...
1  {
2      let day;
3      switch (new Date().getDay()) {
4          case 0:
5              day = "Sunday";
6              break;
7          case 1:
8              day = "Monday";
9              break;
10         case 2:
11             day = "Tuesday";
12             break;
13         case 3:
14             day = "Wednesday";
15             break;
16         case 4:
17             day = "Thursday";
18             break;
19         case 5:
20             day = "Friday";
21             break;
22         case 6:
23             day = "Saturday";
24             break;
25     }
26     document.write("Today is " + day);
27 }
```

Output:

Today is Friday

4. List out total 6 fruits which name starts with A letter and B letter when user input name of any one fruit, if the user input fruit name matches with the listed fruit provide the details about that name and price in kg/dozen.

```
fruit.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3
4  <head>
5      <meta charset="UTF-8">
6      <meta name="viewport" content="width=device-width, initial-scale=1.0">
7      <title>Fruit List Checker</title>
8  </head>
9
10 <body>
11     <script src="fruit.js"></script>
12 </body>
13
14 </html>

fruit.js > ...
1  let fruit = prompt("Enter fruit name: ");
2  let fruits = fruit ? fruit.toLowerCase().trim() : "";
3
4  switch (fruits) {
5      case "apple": {
6          document.write("Name: Apple <br>");
7          document.write("Price per KG: Rs. 250/-");
8          break;
9      }
10     case "avacado": {
11         document.write("Name: Avacado <br>");
12         document.write("Price per KG: Rs. 550/-");
13         break;
14     }
15     case "apricot": {
16         document.write("Name: Apricot <br>");
17         document.write("Price per KG: Rs. 350/-");
18         break;
19     }
20     case "banana": {
21         document.write("Name: Banana <br>");
22         document.write("Price per dozen: Rs. 150/-");
23         break;
24     }
25     case "blueberry": {
26         document.write("Name: Blueberry <br>");
27         document.write("Price per KG: Rs. 650/-");
28         break;
29     }
30     case "blackberry": {
31         document.write("Name: Blackberry <br>");
32         document.write("Price per KG: Rs. 500/-");
33         break;
34     }
35     default: {
36         document.write("Sorry ! Fruit name doesn't match.");
37     }
38 }
```

Output:

192.168.1.74:5500 says

Enter fruit name:

OK Cancel

Name: Blueberry
Price per KG: Rs. 650/-

5. Create 4 array and store 5 students roll number, name, phone number and email then display all details of a student including roll number, name, phone number and email using for loop.

```

studentDetailsList.html > ...
1  <!DOCTYPE html>
